

**JetSpray™
Thermal**

JetSpray™ Approved Equipment List

It's easy to convert to JetSpray Thermal Insulation. If you have a truck, all necessary equipment can be easily installed in it. You may already have some of the required machines. The following is a list of approved devices that can be used to install JetSpray Thermal Insulation—providing homes with superior thermal and acoustic protection.

If you have questions, contact Knauf Technical Support at (800) 825-4434, ext. 8727.

Blowing/Spraying Machines

- Capitol Models 70, 80, 100 & 125, Capitol Machine
- Cool Machines CM3500 & CM4500, Cool Machines¹
- Meyer® Series 1300, 1400 & 3000, Wm. W. Meyer & Sons, Inc.
- All Volu-Matic® Series Machines, SE Model & Attic Matic™, CertainTeed Machine Works²
- Monsoon 1000, Dahl Mfg.
- Heat Seal 5000 Series, Heat Seal Equipment, Ltd.
- Fiberstar III, Super Star III, Super Star Supreme III & Vol-U III, Star Machine, Ltd.
- Stanco 1400 & 1800, Stanco Machine
- InsulMaxx 4000/5000 (electric), Spray Insulation Components
- Krendl™ 5200 & KS260, Krendl™ Machine Co.³
- Turbo Force HP2, Intec
- Turbo Force Max, Intec
- Turbo Shredz, Service Partners

Note: You will need a total 150' of hose for your machine—50' of hose that fits your machine outlet; 50' of 3"; and 50' of 2.5" or 3" depending on nozzle size.

Water Pumps

- Model IOTA 17/M or equivalent (Udor), Spray Insulation Components
- Model MP20 (Dynesco), Spray Insulation Components

JetSpray Nozzles

- 2-1/2" Model 14202JS, Spray Insulation Components
- 3" Model 12203Q, Spray Insulation Components

Vacuum/Recycle Machines

- Model WV-400, Wolverine Steel & Welding
- Model GV180 18 hp, Krendl™ Machine Co.
- Model CV-14-4"-6" 14 hp, Capitol Machine

Note: 150' of 4" flexible hose is required. Also, order 2 each of 4" hose couplers.

Recycle Equipment

- Vacuum Collection Box # RCVB 100, Spray Insulation Components

Quick-drying JetSpray typically allows installation of drywall the next day.

Easy installation around wires and other obstructions eliminates gaps in cavities.

Contractors may already have some of the equipment required to install JetSpray.

KNAUFINSULATION
it's time to save energy

Vacuum Accessories

- Vacuum Suction Attachment #VSA 100, Spray Insulation Components

Wall Scrubbers

- Model SC2400 or SC2400BP, Spray Insulation Components
- Model 349C-B or 349B-B, Krendl™ Machine Co.
- Model CT-Cool Tool, Cool Machines

Note: It is recommended more than one scrubber be inventoried by each insulation contractor, so there is a backup if there is difficulty with your primary unit. Not having a scrubber will shut you down. Also, be aware that scrubbing tight areas such as closets will necessitate a narrow scrubber. Please specify scrubber width to the vendor when ordering.

Water Supply Tank

- Any agricultural poly tank approved for holding water. These can be sourced from most any local farm/ranch supply store. We recommend 65-gallon capacity minimum.

Spray Nozzle Jets

- SJ4001S (Stainless), Spray Insulation Components
- H VV4001SS (Brass), Spraying Systems, Inc.

Note: The JetSpray Nozzle comes with a set of the SS jets listed above. We require the use of stainless steel tips as we've found the brass ones wear very quickly allowing more water than necessary to be applied when spraying JetSpray Thermal Insulation. The only jet size recommended for the JetSpray System is listed above.

Fittings

- Miscellaneous equipment, Spray Insulation Components

Portable Generator (optional)

- Model 4NY99 (or similar), W.W. Grainger, Inc.

Moisture Meter

- Delmhorst BD-10 (p/n MM100) (Analog), Delmhorst Instrument Co.
- GE Protimeter Mini BLD2000 (p/n MM200) (Digital)

Densi-Checker™

- Model DC100, Spray Insulation Components

¹Cool Machines require recycle hopper to have agitator paddles.

²SE Models require an electric water pump.

³Krendl™ models need upper agitator unit.

All trademarks are the property of their respective owners.

JetSpray is a customized solution that meets and exceeds insulation codes.

THE ULTIMATE WALL SYSTEM

To build the ultimate wall, combine JetSpray™ with ECOSEAL Plus™ Air Sealant to form a total air barrier within the building envelope. The ultimate wall provides better comfort, energy efficiency and sustainability. Become an authorized installer for both by visiting ecosealplus.knaufinsulation.us
